# DL2.0 Workshop

1. Install Python 3
   ```
   sudo apt install python3 python3-pip
   ```

2. Download the workshop code:
   ```
   git clone https://github.com/gauravmm/DL2W.git
   ```

3. Install requirements (in the cloned repository):
   ```
   pip3 install -r requirements.txt
   ```

4. Download the datasets and pretrained models:
   ```
   python3 workshop.py --datasets –pretrained
   ```
   (You need an ethernet or VPN connection for this last step!)
